Your Technology Advisor

PROACTIVE BUSINESS MANAGEMENT

You work in a digital world, so when your systems are down, the potential is high for lost productivity, lost customers, and lost revenue. You can minimize this cause and effect outcome with one simple solution—a business continuity plan. TeamLogic IT can help you develop and implement a business-specific continuity plan to protect the backbone of your company—your data.

THE THREE P'S

People, policy and procedures are the three buckets that drive business success. They can also be its downfall. A business continuity plan formalizes your company's IT policies, procedures and precautions to minimize downtime should the worst happen. It's basically risk management in action on a daily basis. You are managing potential risks that could impair or jeopardize your business IT. What are those risks? They can be anything from viruses or equipment failure to fire, hurricane or other natural disaster. More often than not, it falls into the camp of human error. TeamLogic IT assesses your business infrastructure, operations and environment to develop and deploy a business continuity plan tailored to your company.

MANAGE MARKET CHANGES IN STRIDE

Businesses evolve over time for a myriad of reasons—new regulations, mergers and acquisitions, growth spurts. TeamLogic IT helps you manage change, enabling your company to be nimble and responsive. Whether you're a financial services firm needing new workflow procedures to address compliance, a healthcare company struggling with new regulations, or a real estate brokerage requiring a transition plan to absorb an acquisition, our team will help your business stay on track. From stress-free administration of your data backups to enterprise-grade security encryption and everything in-between, taking steps to protect your data is the goal of our business continuity planning services.

BUSINESS CONTINUITY PLAN

A business continuity plan from TeamLogic IT includes:

- *The process, technology and tools to keep your systems running*
- *Data backup and recovery procedures, including resources that allow for a business to recover quickly in the event of a failure*
- *Procedures to best assure systems remain operational and minimize human and local factors that might impact continuity*

Call TeamLogic IT today and get your business continuity plan in the works.
